Lesson outline	In today's lesson, we will be investigating the relationship between square millimetres, centimetres and metres, then apply this understanding to calculating area.	In today's lesson, we will learn to calculate the volume of cubes and cuboids and then apply this to volume problems.	In today's lesson, we will learn to convert between grams and kilograms and use this to solve problems involving mass.	In today's lesson, we will convert between pounds and pence, and then work on multi-step problems involving calculation of measure.	In today's lesson, we will learn to convert between units of time, look at equivalent times and then solve problems involving time.	
Extra Notes	Complete worksheets in your pupil book or on paper.	Complete worksheets in your pupil book or on paper.	Complete worksheets in your pupil book or on paper.	Complete worksheets in your pupil book or on paper.	Complete worksheets in your pupil book or on paper.
