	Lesson outline	In this lesson we will be exploring tenths as fractions, different representations of decimals and fractions.	In this lesson, we will be looking at fractions and decimals on a number line to deepen our understanding. As well as looking at a container to understand fractions and decimals.	In this lesson, we will be comparing two decimals and looking at greater than/smaller than symbols to help you answer the questions.	In this lesson, we will be counting in multiples of 10, 100 and 1000s (join in with the counting!) Recapping on rounding whole numbers and decimals to whole numbers using a number line.	In this lesson, we will be counting in multiples again (make sure to join in!) solving number problems and investigations of rounding decimals.
	Extra Notes	Make sure to complete the worksheet and exit quiz!	Make sure to complete the intro quiz, worksheet and exit quiz!	Make sure to complete the intro quiz, worksheet and exit quiz!	Remember what we have learnt at school about rounding. Make sure to complete the intro quiz, worksheet and exit quiz!	Make sure to complete the intro quiz, worksheet and exit quiz!
