	Lesson outline	<p>In this lesson, we develop understanding of equivalent fractions through quantity, area and number line models.</p>	<p>In this lesson, we develop understanding of equivalent fractions through the contexts of measuring and pouring.</p>	<p>In this lesson, we use the relationship between the numerator and denominator to identify equivalent fractions.</p>	<p>In this lesson, we scale the numerator and denominator by the same factor to produce equivalent equations.</p>	<p>In this lesson, we practise seeing both vertical and horizontal relationships in the context of equivalent fractions.</p>
