	Lesson outline	<p>This lesson introduces equivalent fractions for non-unit fractions.</p>	<p>In this lesson, we explore the relationship between numerators and denominators including non-unit fractions.</p>	<p>In this lesson, we practise using both vertical and horizontal relationships in fractions to find missing numbers.</p>	<p>Further practice using examples to deepen and consolidate learning.</p>	<p>In this lesson, we revise the language of 'factor', 'multiple' and 'common factor.'</p>
