Friday 3 February

Year 5 & 6 girls at Aston Villa Football Tournament

EYFS

Next week, we will be starting a new topic all about France. The children will be tasting French food, learning about the French customs, traditions and about some of their famous landmarks. We will be making an Eiffel tower out of straws. The children will be exposed to the French language and learn some simple words.

Thank you to all our parents for being so fantastic about coming to our handwriting mornings and supporting your children with homework every week. It really does make a big difference to your child.

KS1

This week we have finished our animals science topic. The children have really enjoyed making bird food cakes to feed the birds outside. This will give the children an opportunity to observe the birds as bird watchers.

The Year One children have also enjoyed writing pet poems using repeated language and verbs. They are fantastic! Next week we will be starting our new international topic – it is a secret as to which country we have chosen!

LKS2

This week we have been learning about all the bones in our body. We have been trying really hard to use the scientific names for them. Next week we will be learning about China. We have are going to concentrate on 4 topics: food, dragons, Thai chi and writing.

Bible Verse of the Week

“Be strong and courageous. Do not be afraid; do not be discouraged, for the LORD your God is with you wherever you go.”

Joshua 1:9

UKS2

Next week we are starting our Japan International topic. This is going to be a fantastic two weeks to learn about another culture. On Thursday we are very excited to be going to the Zen-Chi Martial arts academy as part of our topic. The children will have the chance to experience Japanese culture by trying some food, learning some greetings, and even taking part in some basic karate lessons! You will be receiving letters about this trip imminently, which will contain all of the information that you need.

In Science this week we finished off our 'Get Sorted' materials topic by conducting an experiment to test the viscosity of liquids. We tipped various types down a large board and timed how long they took to run to the bottom. I still think we are waiting for the ketchup to finish!

Information from the office

Please can all parents be reminded that we only allow bottles of water in school - no juice or soft drinks.

The school gates need to be kept clear at all times. This is for access and to prevent any dangerous situations occurring.
